WindLGC Software

Programming Software for IDEC SmartRelay

Key Features
- Function Block or Ladder programming
- Online Test features
- Program Simulation

Create
Create, simulate, test and save your program using drag and drop functions. Eight basic functions make it easy to create a simple switching program in just a matter of seconds, while 31 additional special functions make it just as uncomplicated to create complex programs. Choose function block diagrams or ladder programming; you can always convert from one to the other with the click of an icon.

Simulate
Offline program simulation (without the need for an actual SmartRelay) enables testing of the entire program from a PC.
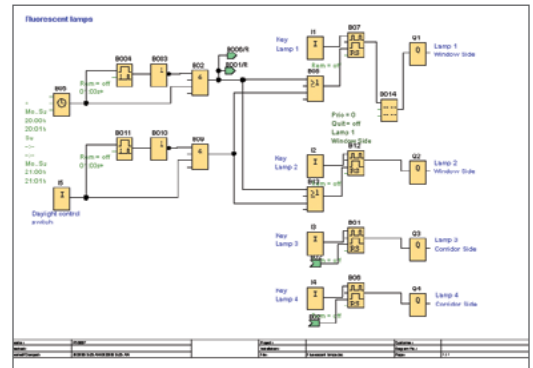

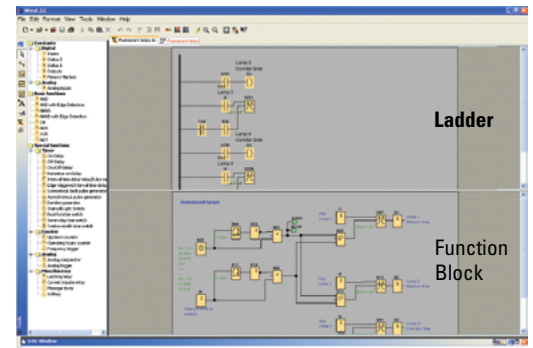

Test
Once you verify your control program works in Simulation Mode, WindLGC allows you to directly monitor your IDEC SmartRelay during operation using an Online Test mode.

Document
You can create and save your WindLGC program as a PDF, BMP or JPG file. Professional documentation is included with all the necessary configuration information, such as comments and program settings.

Part Number	Description
FL9Y-LP1CDW	SmartRelay programming software

Visit IDEC at www.IDEC.com/smartrelay for additional information on FREE software upgrades, demo software, FAQs, manuals and brochures.
